

# Study tropical ecology and conservation

field course  
with NEW online modules

Gain practical skills for conservation and research careers.

Learn from internationally-renowned biologists.

Develop expertise in leadership and teamwork.

Design and carry out your own research project.

Build networks with scientists from around the world – half the participants will be from Africa, half from elsewhere.

For the first time we include an online element before the course starts. Join us on this exciting virtual journey.

**Mpala Research Centre, Kenya**  
**12 August to 6 September 2022 inclusive**

Click here [www.tropical-biology.org](http://www.tropical-biology.org)

Applicants should have completed three years of a biological degree.

Teaching will be at Masters degree level.

Courses are worth 10 ECTS credits.

Great value: tuition, accommodation and meals included.

Students from Tropical Biology Association member institutions pay reduced course fees.

Scholarships available.
