

TROPICAL BIOLOGY ASSOCIATION

# Field course in tropical ecology and conservation

APPLY ONLINE  
by 14th April

Kibale Forest National Park, Uganda  
28th July to 24th August 2023

Gain practical skills for conservation and research careers.

Learn from internationally-renowned biologists.

Develop expertise in leadership and teamwork.

Design and carry out your own research project.

Build networks with scientists from around the world.

*"This course allowed me to build a strong network in conservation and encouraged me to continue working in this field full of passionate people."*

Blanche Pioger, Switzerland

More details [www.tropical-biology.org](http://www.tropical-biology.org)

Applicants should have completed three years of a biological degree.

Courses are worth 10 ECTS credits.

Students from Tropical Biology Association member institutions pay reduced course fees.

Scholarships available.
